# iVEEC's Visualisation Capability

Paul Bourke

Why - Who - Where - What - How

Visualisation is the process of applying advanced computing techniques to data in order to provide insight into the underlying structures, relationships and processes.

## Panel | (512858mE 7714203mN)

|                       |                                |
|-----------------------|--------------------------------|
| Aspect:               | North                          |
| Technique:            | Pecked                         |
| Style:                | In filled                      |
| Form:                 | Enigmatic                      |
| Clarity:              | High                           |
| Weathering:           | Low                            |
| Boulder Size (mm):    | 590 x 380 x 330                |
| Motif Size (mm):      | 120 x 110                      |
| Location of Panels:   | Small rock outcrop (rock pile) |
| Lithology:            | Basalt                         |
| Disturbance (%):      | 10                             |
| Erosion:              | Low                            |
| Rock and Motif Color: | Brown/Light                    |
